

Prevalence of glucose intolerance, and associated antenatal and historical risk factors among Malaysian women with a history of gestational diabetes mellitus

Chew WF, Rokiah P, Chan SP, Chee SS, Lee LF, Chan YM

Singapore Med J 2012; 53(12): 814–820

On page 815, Methods section, paragraph 2, lines 9–11, the correct sentence should be, “Therefore, the formula used for this study should be $n = [1.96^2 \times (0.126 \times 0.874)] / 0.05^2$, and the sample size needed was 169.”
